

Frypod Counter Top Fryers

Breaking ground with its innovative design, the Roband Frypod excels with its performance, safety and cleanliness of operation.

Delivering perfectly fried food time after time, the responsiveness of the Frypod elements to any drop in temperature has been honed and the temperature band that the fryer continues to operate in when loaded with food has been tightened.

This ensures that the temperature drop of the oil is minimised during the cooking process, delivering consistent, perfect results. It also means less oil in the food and longer oil life.

With a modern brushed stainless steel finish, the sleek exterior also houses a simple but clever safety lock mechanism that prevents users from removing the elements when the machine is switched on and prevents the machine from being turned on when the elements are removed.

Smart safety lock mechanism prevents element removal when machine is on

Elements swing back and lock in place for element draining and tank removal
